

Average Results

** Average results on every system or strategy of course will vary depending on attention to detail and execution of the system, stock selection for option plays, money management position sizing market conditions. We have no access to net trading results of customer's trading unless volunteered, sent to us. And customer's results may be polluted by other trading ideas, emotionalized concepts, lack of total understanding of the system, lack of total accuracy of execution of a system or strategy, lack of attention, lack of execution and so on. So we don't have "average results" of purchasers of our products there is no such thing and is not applicable. And on top of that, we can not access people's broker accounts to see how they are really doing if they are indeed trading our products or not or a mix of our products and who knows what else.

We do not promise any future success whatsoever with our products. Any sort of expectancy of guarantees in the marketplace is a mindset that most often leads to loss. Of course we hope our products do extremely well into the long distance future but we can't "guarantee" you that and no one can. Just like with any business venture, or anything in life, there is no guarantee of future success. You are taking a risk with everything you do in trading, business in general, and in life.

Your performance will vary. Your performance will also depended upon your accuracy in executing the trading system. You could screw it up if you don't learn the system or you could simply screw it up!! (so learn the system well and practice much!) You could net out profit, considerable profits or you could lose your shirt and everything you have and go bankrupt, have to move back with your parents and all sorts of other potential problems and stresses that come from losing all of your money... etc... That said we hope you can

systematically net out profits over time and compound those profits onto extreme success! And we wish you the best into the future!

** Results will vary from student to student depending on the correct use of the system and the actual use of the system. Many never use the system. Some never consistently apply the system. Stock and options choice will vary in the results they produce. We can not promise you any future success since we are dealing with price markets. Our, your best bet for success is in taking a chance on a system that has performed well consistently over time in the hopes that possibility and probability that the systems performance, in combination with your performance of that system will do well at the present and into the future... We make no promises or guarantees of future performance whatsoever however good our trading systems & strategies may be at the point in time of performance results. Posted customer feedback was done voluntarily by customer and we did not even ask. We appreciate all feedback from our customers.

Note: typical results or average results will range from lost money for those who break rules and refuse to trade the system correctly to zero for people who don't take any action to some of the customer examples as you see above and to results customers have not told us about. Bottom line: this is trading: you can't 'expect guaranteed results' because that is a losing mindset in trading and it doesn't make any sense to good trading. You get a system to increase your chance, your probability, your potential for success. The only way you could 'guaranteed make money' like past results is to have a crystal ball – the pursuit of which, searching for a crystal ball is a ever losing adventure. Trade right. Trade smart and maybe you could have great success too!

**** Any student testimonials were submitted by customer by their own inspiration and did not receive any compensation or their testimony, success story, review or feedback. Posted for

encouragement. Your results may vary worse or better.

Every effort has been made to accurately represent our product and it's potential. Any claims made of actual earnings or examples of actual results made by us can be verified upon request although with the student who sends us any report of their success verification of their statements would have to be done with them since we don't have access to their brokerage accounts. The testimonials and examples used are exceptional results, don't apply to the average purchaser and are not intended to represent or guarantee that anyone will achieve the same or similar results. Each individual's success depends on his or her background, dedication, desire and motivation. As with any business endeavor, there is an inherent risk of loss of capital and there is no guarantee that you will earn any money.
